(54) Title: ORDERING AUDIO SIGNALS

(57) Abstract: A method for ordering a plurality of audio signals into a sequence comprising receiving (104) a user preference, analysing (108) the plurality of audio signals to extract inherent features and ordering (110), independently of user involvement, into a sequence at least two of the plurality of audio signals based on a comparison of the extracted features and user preference such that adjacent signals in the sequence are harmonious. The plurality of audio signals may be identified (106) according to the user preference. The ordered audio signals may be outputted (112).
